# WHY PERFORM A TRANSMISSION SERVICE?

**DID YOU KNOW?** A typical drain & fill service only replaces around 40% of the old depleted /contaminated fluid. Adding new ATF at this point immediately cross contaminates it with the old, dirty, worn-out fluid!

A complete transmission system service utilizes a transmission system cleaner to chemically dissolve and suspend varnish, sludge, and other contaminants prior to performing the fluid exchange to safely remove them from the transmission along with the old, oxidized fluid. Then, a transmission conditioner is introduced along with the new fluid.

Benefits of performing a complete transmission system service include:

- Smoother shifting.
- Quieter operation.
- Reduced operating temperature.
- Increased fluid life.
- Reduced component wear.

Scan here to sign up to take our online training & become a Certified True Tech today!

## SYNTHETIC MULTI-VEHICLE ATF PROTECTANT

Specially engineered to protect transmissions against wear, heat, and stress and to help provide smoother shifting. Enhances Dexron/Mercon ATF to perform like a Highly Friction Modified ATF. This formula also enhances Dexron/Mercon ATF into a highly-stable fluid suitable for use in systems requiring Mercon V or Dexron VI ATF.

- Prevents & stops torque converter shudder.
- Helps maintain proper shifting.
- Dramatically reduces wear.
- Prevents overheating, foaming and oxidation.

Part # T4SMV

## ATF CLEAN & PROTECT 2-STEP KIT

**True Brand ATF Cleaner** dissolves and suspends deposits, helping flush the transmission of oxidized fluid, sludge and other contaminants, and helps remove wear metals that grind away at seals, valves, and friction surfaces. *(also sold separately: Part# T408)*

**True Brand ATF Treatment** is formulated to bond to the transmission's metal friction surfaces to reduce friction and heat, which in turn helps prevent wear for all working components. *(also sold separately: Part# T4088)*

- Cleans, protects, and helps extend the life of automatic transmissions.
- Works against oxidation and fluid breakdown to protect, condition, and enhance ATF performance.
- Suitable for use in most ATF applications.

Part # T4412

Part # T4F128 Part # T4F32

## FULL-SYNTHETIC MULTI-VEHICLE ATF

Engineered to be suitable for use in most automatic transmissions including but not limited to those recommended by original equipment manufacturers to use DEXRON II, DEXRON III G/H, DEXRON VI, Ford MERCON V, MERCON LV, Toyota T-III, Toyota T-IV, Toyota WS, Honda Z-1, Nissan Matic D, Nissan Matic J, Matic S, Mitsubishi SP-II and SP-III, JASO 1A, ZF-TE-ML-14A, MAN 339 Type Z-1, Mercedes Benz (Daimler Chrysler) MB NAG-2, VW, BMW, Allison C-4, TES 389, Z-F, Voith and many others.

- Superior friction and anti-shudder performance.
- Superior oxidation control.
- Superior anti-wear protection.
- Prevents overheating, foaming and oxidation.

## CVT CLEAN & PROTECT 2-STEP KIT

**True Brand CVT Cleaner** dissolves and suspends CVT/DCT deposits, helping flush oxidized fluid, sludge, wear metals, and other contaminants that grind away at friction surfaces. *(also sold separately: Part# T4CV08)*

**True Brand CVT Treatment** is a multi-vehicle formula engineered to protect & condition the CVT and DCT transmission systems to enhance performance and transmission life. *(also sold separately: Part# T4CV088)*

- Cleans, protects, helps extend the life of continuously variable & dual clutch transmissions.
- Works against oxidation and fluid breakdown to protect, condition, and enhance performance.
- Suitable for use in most CVT & DCT applications.

Part # T4CV12

Part # T4CV28 Part # T4CV32

## FULL-SYNTHETIC MULTI-VEHICLE CVT

Engineered to be suitable for use in all vehicles with continuously variable transmissions. This formula is optimized with long-life friction modifiers that provide optimal torque transfer, superior metal-to-metal wear and extreme pressure protection. In addition, anti-wear additives provide excellent anti-shudder and superior wet clutch performance, while extending CVT life. It also contains components that prevent oxidation and protect against thermal breakdown that leads to sludge and varnish build up.

- Ensures CVT performance.
- Superior friction and anti-shudder performance.
- Superior metal to metal protection.
