

GDI EMISSIONS & CRANKCASE SYSTEM CLEANER

SOLID SHEET

True Brand® GDI EMISSIONS & CRANKCASE SYSTEM CLEANER is engineered to safely address deposit issues associated with today's complex, expensive, deposit-sensitive engines.

- Cleans Oily Deposits and Carbon from the PCV System.
- Helps Clean Intake Valve Deposits.
- Dissolves Crankcase Varnish, Sludge, and Carbon Deposits.
- Helps Improve Oil Drain.

***Safe and Effective for ALL GDI & PFI GASOLINE and DIESEL ENGINES!!
NOT for use in ROTARY ENGINES.***

Truth - Application / Directions

- **SHAKE WELL.**
- Add entire contents to crankcase.
- Immediately start engine, idle for four to six minutes, then turn engine off.
- Change oil and filter.

NOTE: For engine deposits related to the fuel and induction systems, apply True Brand GDI products in the following order:

- 1) True Brand GDI Fuel System Cleaner
- 2) True Brand GDI Emissions & Crankcase System Cleaner
- 3) True Brand GDI Induction Cleaner

FOR BEST RESULTS, USE AT EVERY OIL CHANGE.

Truth - Features / Benefits

True Brand GDI EMISSIONS & CRANKCASE SYSTEM CLEANER provides a unique formula to safely address deposit issues associated with today's complex, expensive, deposit-sensitive engines.

- Contaminant-removing formula helps clean the PCV system of oily particulates and helps remove intake valve deposits by circulating special additives through the PCV system.
- Dissolves crankcase varnish, sludge, particulates, and carbon deposits that pollute the PCV system and trap heat in the crankcase to degrade engine oil and increase crankcase deposit accumulation.
