

CETANE-UP

CONCENTRATED CETANE POWER BOOSTER

SOLID SHEET

Diesel engines perform optimally with cetane levels of 50 or higher, but the cetane levels of most diesel fuel in North America only ranges between 40-45. Low cetane levels in diesel fuel can cause dirty exhaust and creates deposits in the Diesel Particulate Filter (DPF) as well as issues like poor engine starts, rough idling, increased smoke from incomplete combustion, reduced fuel efficiency, increased emissions, increased engine wear and potential power loss due to delayed ignition and combustion within the engine cylinder, making it less efficient overall

True Brand® CETANE-UP is a concentrated formula that boosts the cetane rating of diesel fuel by up to 3 numbers (30 points), ensuring maximum horsepower, improved fuel economy, and smoother starts for all diesel engines.

- Increases Cetane by up to 30 Points.
- Improves Startability and Smooths Idle.
- Increases Torque and Horsepower.
- Improves Fuel Economy.

Truth - Application / Directions

- Pour contents into fuel tank.
- Treats up to 25 gallons (94.6L) of diesel fuel.

For best results, use at every fuel fill-up.

Truth - Features / Benefits

True Brand CETANE-UP uses unique chemistry to target and eliminate issues specific to low cetane levels and unlock maximum power and performance.

- Boosts the cetane rating of diesel fuel by up to 3 numbers (30 points).
- Reduces dirty exhaust and emissions.
- Improves fuel economy.
- Improves startability and smooths idle.
- Increases torque and horsepower.
