

GDI THROTTLE BODY

3-STEP KIT

SOLID SHEET

True Brand® GDI THROTTLE BODY 3-STEP KIT is a more aggressive formula engineered to safely clean the tenacious hard carbon deposits that build up and choke performance in today's new engine designs. Chemically cleans fuel systems from the gas tank to the exhaust and quickly dissolves and removes gum, varnish, carbon, and other deposit build up from the throttle valve, throttle body, idle air control valves, PCV valves, and other parts of the air intake system. ***Requires NO ENGINE TEAR-DOWN – can be applied by techs of all skill levels!***

- Helps Restore Power and Performance.
- Helps Restore Fuel Economy.
- Safely Removes Water and Fights Ethanol Problems.
- Safe and Effective for ALL GDI & PFI Gasoline Piston Engines.
- Induction Cleaner NOT FOR USE in Rotary or Diesel Engines.

Truth - Application / Directions

- See Application Sheet for Step-By-Step Directions.

For best results, perform service every 15,000 miles (24,600 km), whichever comes first.

Truth - Features / Benefits

True Brand GDI FUEL SYSTEM CLEANER provides hotter, more aggressive 2-stage cleaning for GDI and PFI engines from the gas tank to the exhaust, dissolving gums, varnish and carbon deposits. It also safely removes water from the fuel system through the combustion process and helps fight ethanol problems.

True Brand GDI INDUCTION CLEANER disperses an atomized cleaning solution throughout the air intake system, specifically formulated for tenacious intake valve deposits left unwashed by GDI engines. Powerful 2-stage cleaning dissolves injector tip deposits and knock-producing combustion chamber deposits.

True Brand THROTTLE BODY & AIR-INTAKE CLEANER quickly dissolves and removes gums, varnish, carbon, and other deposit build-ups from the throttle valve, throttle body, idle air control valves, PCV valves, and other parts of the air induction system that cause rough idling, hard starting, stalling, and poor acceleration.

- Cleans fuel system and protects against future deposits.
- Safely removes water from the fuel system and fights ethanol problems.
- Removes harmful deposits from the induction and emissions systems.
- Increases the airflow to fight rough idle, hesitation, and poor acceleration.
