

# DEF+ DIESEL KIT

## SOLID SHEET

True Brand® DEF+ DIESEL KIT optimizes diesel engine performance and helps prevent costly issues.

DEF SHIELD effectively removes crystalline deposits from the diesel DEF and Selective Catalyst Reduction (SCR) system while preventing new deposits from forming. CETANE-UP boosts the cetane rating of diesel fuel by up to 3 numbers (30 points), ensuring maximum horsepower, improved fuel economy, and smoother starts for all diesel engines.

Together, these additives improve efficiency, protect vital systems, and help keep diesel engines running at peak performance.

- Eliminates and Prevents DEF Deposits.
- Restores Optimal DEF Spray Pattern.
- Reduces DEF Consumption.
- Reduces Back Pressure.
- Prevents Costly Repairs.
- Increases Cetane by up to 30 Points.
- Improves Startability and Smooths Idle.
- Increases Torque and Horsepower.
- Improves Fuel Economy.

### Truth - Application / Directions

- Pour contents of Cetane-Up into fuel tank.
- Pour contents of DEF Shield into DEF tank prior to fill-up.

*For best results, use at every fill-up of the DEF tank.*

### Truth - Features / Benefits

True Brand DEF SHIELD protects the DEF and SCR system by preventing crystallization, ensuring smooth fluid flow, and safeguarding components like injectors and pumps, especially in cold weather. True Brand CETANE-UP enhances fuel combustion by boosting the cetane number, resulting in improved engine power, quicker starts, smoother acceleration, and reduced emissions.

- Boosts the cetane rating of diesel fuel by up to 3 numbers (30 points).
- Reduces dirty exhaust and emissions and improves fuel economy.
- Cleans and protects DEF and SCR system from future crystalline deposits.
- Restores DEF consumption and restores optimal spray pattern.
