

SYNTHETIC POWER STEERING TREATMENT

SOLID SHEET

True Brand® SYNTHETIC POWER STEERING TREATMENT is a professionally engineered synthetic leave-in treatment fortifies all types of power steering fluid with a concentrated blend of antioxidants, detergents, and friction-reducing technology designed to reduce wear, foaming, and squeal, helping to extend power steering system life!

- Leave-In Treatment.
- Extended Protection on All Working Components.
- Helps Reduce Power Steering Squeal.
- Helps Extend Power Steering System Life.

Truth - Application / Directions

- SHAKE WELL.
- Pour entire contents into power steering reservoir.
- DO NOT OVERFILL.

For best results, use every power steering fluid exchange.

Truth - Features / Benefits

True Brand SYNTHETIC POWER STEERING TREATMENT is a full-synthetic, leave-in treatment designed to reduce power steering squeal, protect the power steering system components and help extend power steering system life.

- Helps reduce foaming and squeal.
- Fights oxidation and fluid breakdown.
- Reduces friction-wear and heat-stress.
- Protects against component failure.
- Chemically inert - does not react to other chemicals.
- Sub-micron particle (starting at .05 microns) formula to better fuse to the metal asperities.
- Formulated bonding agents designed to fuse to friction surfaces.
- Our PTFE is unique in that friction decreases exponentially as load and/or pressure increases.
