

# ATF TREATMENT

## SOLID SHEET

True Brand® ATF TREATMENT is a concentrated blend of seal conditioners, anti-wear, extreme-pressure, and anti-oxidant agents designed to replace essential additives in automatic transmission fluid that are depleted during normal operation. Helps condition and protect valves and seals, while preventing oxidation & acid formation. **Compatible with all types of ATF, including Dexron III, Mercon V, and ATF-4.**

**Suitable for use in MOST vehicles with Automatic Transmissions.**

**NOT for use in Continuously Variable Transmissions (CVT) or Dual Clutch Transmissions (DCT).**

- Protects Against Heat and Wear by Reducing Friction.
- Protects Against Component Failure Due to Wear.
- Works Against Oxidation and Fluid Breakdown.
- Helps EXTEND Transmission Life.

### **Truth - Application / Directions**

- **SHAKE WELL.**
- Add entire contents to transmission through the dipstick tube, ATF machine additive injection system, or in-line additive canister.
- **DO NOT OVERFILL.**

**For best results, use True Brand ATF TREATMENT along with True Brand ATF CLEANER every 30,000 miles.**

### **Truth - Features / Benefits**

Save your customers money and protect their transmission with True Brand ATF TREATMENT. Regular preventative maintenance may save on major repair costs and reduce the possibility of a transmission replacement.

True Brand ATF TREATMENT is formulated to bond to the transmission's metal friction surfaces to reduce friction and heat, which in turn helps prevent wear for all working components.

- Fortifies automatic transmission fluid.
- Reduces friction-wear and heat-stress.
- Helps prevent oxidation, acid formation, and fluid-breakdown.
- Helps condition and protects valves and seals.
