

DOT 4 LV BRAKE FLUID

SOLID SHEET

True Brand® DOT 4 LV Motor Vehicle Brake Fluid is engineered to meet the demands of the most sophisticated systems while delivering the performance and quality that not only meets, but exceeds industry standards - ensuring peak performance when it's needed most. **Suitable for use in a wide range of vehicle types, including hybrid and electric vehicles.**

Supports fast response in systems equipped with Electronic Stability Control, Traction Control, and Anti-Lock Brakes (ABS/ESP/ASR/TCS).

- For ALL DOT 3, DOT 4, DOT 4+, and Super DOT 4 Applications.
- Fast Response Time in Low Temperatures.
- Maximizes Brake System Performance.
- Ideal for Electric/Hybrid Vehicles.
- Superior Brake System Protection.

Meets or exceeds OEM, FMVSS 116, ISO 4925 (Class-6), and SAE J1704 specifications. Minimum dry boiling point: 511° F (266° C). Minimum wet boiling point: 491° F (255° C).

Truth - Application / Directions

- Clean ALL debris from around master cylinder cover.
- Fill to level specified by manufacturer, then replace cover.
- NOTE: Avoid spilling on car finish. Avoid contact with acidic, basic or oxidizing agents. Keep container closed when not in use. Dispose of empty container in accordance with local, state and federal regulations.

For best results, exchange every 30,000 miles (48,000 km) or as recommended by vehicle manufacturer.

Truth - Features / Benefits

True Brand DOT 4 LV Low-Viscosity Brake Fluid is formulated to support brake performance in cold temperatures, resist water absorption, support corrosion protection, and maintain braking system function.

- Protects metal system components.
- Prolongs fluid life.
- High heat protection.
- Maximizes brake system performance.
