

DOT 3 BRAKE FLUID

SOLID SHEET

True Brand® DOT 3 BRAKE FLUID is formulated to provide superior performance in high-temperature braking systems found in today's automobiles and trucks. Low moisture absorption rate provides excellent rust and corrosion protection for all metals throughout a vehicle's brake system. Helps maximize ABS performance while meeting and/or exceeding the requirements for DOT 3 brake fluid specifications.

True Brand DOT 3 Brake Fluid is suitable for use in ABS, drum or disc brake systems, as well as hydraulic clutches requiring DOT 3 fluid.

- For ALL Applications Calling For DOT 3 Fluid.
- Protects Against Wear, Oxidation, and Corrosion.
- Dry Boiling Point: 401° F / 205° C.
- Excellent Vapor Lock Protection.

Truth - Application / Directions

- Follow directions on brake fluid exchange machine.

For best results, exchange every 30,000 miles (48,000 km) or as recommended by vehicle manufacturer.

Truth - Features / Benefits

True Brand DOT 3 BRAKE FLUID is formulated to help maximize ABS performance while meeting or exceeding requirements for both DOT 3 brake fluid specifications.

- Protects metal.
- Prolongs fluid life.
- High heat protection.
- Maximizes ABS performance.
- Dry boiling point: 401° F / 205° C.
- Reduces the risk of fluid evaporation and possible brake failure.
- Low-moisture absorption rate formula providing excellent vapor lock protection.
- Protects brake system against pump breakdown caused by wear, oxidation, and foaming.
- For all ABS, drum, or disc brake systems including hydraulic and disc brakes requiring DOT 3 fluid.
