

# DOT 4 BRAKE FLUID

## SOLID SHEET

True Brand® DOT 4 BRAKE FLUID is formulated to provide superior performance in today's high-temperature braking systems. Low moisture absorption rate provides excellent rust and corrosion protection for all brake system metals. Helps maximize ABS performance while meeting and/or exceeding requirements for DOT 3 or DOT 4 brake fluid specifications.

***True Brand DOT 4 Brake Fluid is suitable for use in ABS, drum or disc brake systems, as well as hydraulic clutches requiring DOT 3 or DOT 4 fluid.***

- For ALL Applications Calling For DOT 3 or DOT 4 Fluid.
- Protects Against Wear, Oxidation, and Corrosion.
- Dry Boiling Point: 446° F / 230° C.
- Excellent Vapor Lock Protection.

### ***Truth - Application / Directions***

- Follow directions on brake fluid exchange machine.

***For best results, exchange every 30,000 miles (48,000 km) or as recommended by vehicle manufacturer.***

### ***Truth - Features / Benefits***

True Brand DOT 4 BRAKE FLUID is formulated to help maximize ABS performance while meeting or exceeding requirements for both DOT 3 and DOT 4 brake fluid specifications.

- Protects metal.
- Prolongs fluid life.
- High heat protection.
- Maximizes ABS performance.
- Dry boiling point: 446° F / 230° C.
- Reduces the risk of fluid evaporation and possible brake failure.
- Low-moisture absorption rate formula providing excellent vapor lock protection.
- Protects brake system against pump breakdown caused by wear, oxidation, and foaming.
